

*Strong partnerships in the interest
of innovation*

The future of energy presents significant challenges. Repower and its partners are joining forces to tackle them.

*Find out more on
the following pages* >>

Cooperation and innovation are keys to success

With the changes taking place in the energy sector, effective cooperation with partners matters more and more. Reshaping the energy system poses major challenges that the industry can only overcome through joint efforts. It is all about sharing know-how, joining forces, and bringing innovations to market. Repower has a long track record of intensive partnerships in project development, generation, trading, distribution, sales, and devising innovative solutions. So in this year's Annual Report we are also giving space to our partners, as well as glimpses into some typical examples of the numerous projects currently under way:

PROJECT DEVELOPMENT – Repower is working on a project to build a combined-cycle gas turbine power plant at CHEMPARK in Leverkusen, in close cooperation with the site operator CURRENTA.

p. 16-17

GENERATION – The Repartner partnership model provides access to international generation capacity for power supply companies such as the Liechtensteinische Kraftwerke, Wasserwerke Zug, and IBAarau.

p. 18-20

TRADING – "Repricer" is an innovative online tool from Repower that municipal utilities and industrial customers can use to procure electricity quickly and easily at wholesale prices.

p. 21

DISTRIBUTION – Repower provides grid maintenance and power distribution services to downstream municipal utilities such as "Azienda Elettrica Comunale Brusio" and "Impresa Elettrica Comunale Poschiavo".

p. 22-23

SALES – Repower is not only an energy supplier, but also an advisor and equal partner for its customers – for example, the Grand Plaza Hotel in Bucharest, Romania, and the Braccialini Group in Italy.

p. 24-27

INNOVATIVE SYSTEMS – The BeSmart project mixes Swisscom telecommunications know-how with Repower energy expertise to create a profitable collaboration.

p. 28-29
